“ *You will be truly missed Grammy! I know you are in a better place now where you will continue to watch over us and support us. It was hard having you live so far away for so many years, so I'm glad I was able to spend the last five years getting to know you better when you moved to Virginia. I miss and love you Grammy <3*

“ I will miss you Grammy. I have so many fond memories of summers at your home, the walks every morning, the picking of blueberries to make blueberry pies, the homemade peanut butter rolls (your favorite), the board games with all the grandchildren together, the state park down the road we would swim and go sledding in the snow. The many Christmas' shared will all the family together.. So many memories I will keep forever, love you!
